Summary

- Broad experience in design thinking for various fields including: Architectural, interior design, interior submarine design and engineering.
- Highly driven, fast learner, great attention to the overall design processes which resulted in increased revenue of \$3 million within 11 months.
- Ability to communicate with clients, organize, create procedures and protocols to help streamline design processes.
- Multitasking at an "Olympic level!" in a fast-paced deadline driven environment closing 14 to 24 projects per week.
- Strength in checking work for design, technical, visual errors & conformity with great attention to detail which saves every project multiple revisions.
- Passionate and high energy attitude that creates a positive effect on the people I work with. For example: I started working at a manufacturing company where the employees rarely spoke to one another. My enthusiasm impacted the work environment creating a friendlier team atmosphere.
